

About us

Josef Poeschl († 9th of June 1998) founded the company POESCHL with 2 "Bechler" spindle lathes in 1960.

The modest premises were located in the West of Munich.

For some intervening years he rented a shop floor in Germering. In the early 70s the need for bigger and proprietary premises grew. In 1973-1974 he built the Poeschl KG factory and office building with a floor space of 2700m².

Since 1960 we manufacture for well-known companies from the automotive, medical, and electronic industry high-precision turning workpieces. This turning workpieces are parts of our daily life. You find them in products such as telephones, computers, automotives, air-conditioners, Video / Hi-fi systems as well as in aeroplanes.

The production area of POESCHL KG was outsourced in November 1989, by founding a further company called POESCHL Praezisionsteile GmbH, which is independent.

The company's shares of POESCHL KG and POESCHL Praezisionsteile GmbH are owned completely by the family. The management is divided by function and executed by the daughters Doris Pöschl-Zitzmann and Eva Poeschl-Palombo, and the sons-in-law Juergen Palombo and Erwin Zitzmann.

2020 - POESCHL 60th anniversary

... turning parts since more than 60 years
